
Transformer Spades Connectors

BRONZE TRANSFORMER SPADES BRONZE SPADE CONNECTORS

Conex Bronze offers from its state of the art casting foundry ,Bronze Spades -transformer spade connectors in high conductivity Copper alloys.

Our range of transformer spades is made from corrosion resistant Bronze and electro-tin plated for superior finish. For use with aluminum or copper wire connectors. We conform to NEMA spacing of the 9/16" diameter. Various spaced holes will accommodate bolted or compression terminal lugs. We also offer various electrical grade Bronze- Copper alloy connectors.

We also manufacture Transformer spade connectors to user specifications and drawings.

We offer tin plated [transformer spade terminals](#) and Tin plated [Transformer spade connectors](#) in high quality Bronze alloys like CDA 955 and CDA 956 with NEMA spacing holes and hole pitch.
